

CrowdStrike Velocity Bundles

Instant, enterprise-grade cybersecurity for Small and Medium Business (SMB) customers.

In a world where cyberattacks are becoming more frequent and more sophisticated, SMBs need modern protection that is fast to deploy, easy to manage, and affordable. CrowdStrike's **Velocity Bundle Program** enables partners to deliver exactly that, with **ready-to-use, competitively priced Falcon packages for**

businesses with up to 250 endpoints.

Designed to reduce deployment time from weeks to hours, Velocity Bundles make it simple to protect new-logo customers with the **lightweight, cloud-native CrowdStrike Falcon® platform** - the global leader in endpoint protection.

Why Velocity Bundles?

Built to accelerate your SMB sales.

- » **Targeted for SMBs:** Ideal for businesses with up to 250 users/endpoints.
- » **Pre-approved pricing:** Discounts and packages ready to present - no extra approvals needed.
- » **Immediate activation:** Orders are provisioned the same day, enabling rapid time-to-value.
- » **Faster sales cycles:** Simplified offering, faster decisions, quicker close.
- » **Perfect for new logos:** Designed specifically to win net-new customers.

Why CrowdStrike?

One agent. One platform. Zero complexity.

- » **High performance, minimal system impact** - lightweight single agent, supports even older operating systems.
- » **Reduced operational load** - fewer tools to manage, automated workflows, and no on-prem infrastructure.
- » **Full consolidation** - NGAV, EDR/XDR, identity protection, cloud security, SIEM, SOAR, threat intelligence, and more.
- » **Faster threat detection & response** - powerful analytics, workflows and automation built into the platform.
- » **Real-time behavioral detection** - stop ransomware and advanced attacks without signatures or updates.
- » **Industry validation** - consistently top-ranked in Gartner, MITRE ATT&CK, SE Labs, AV-Comparatives, and Forrester.

CROWDSTRIKE

Falcon for SMB

Falcon for Small and Medium Business (SMB)

Premium cybersecurity, made accessible.

- » Tailored for organizations without large IT/security teams.
- » Deploys in minutes with zero infrastructure.
- » Automatically updated against new and emerging threats.
- » Enables SMBs to access the same protection used by global enterprises - at a price built for small business.

What's included?

Core Capabilities

- » NGAV + anti-ransomware
- » Real-time protection against modern threats
- » Behavior-based detection
- » Stops attacks instantly, without signatures
- » Endpoint protection (Windows & macOS)
- » Lightweight, fast, zero maintenance
- » Device Control (USB)
- » Prevents unauthorized device access
- » Cloud-managed console
- » Full visibility and control from anywhere
- » Real-time monitoring
- » Instant insight into threats and activity

Extended Capabilities (depending on bundle)

- » EDR - advanced detection & response
- » Enhanced threat analytics
- » Managed firewall & application control
- » Integrated threat intelligence
- » Ecosystem integrations (SIEM, SOAR, identity, cloud)
- » Optional MDR for 24/7 expert support

Benefits with Exclusive Networks

- » Pre-sales support and commercial assistance to accelerate deal closure.
- » Marketing kits and ready-to-use materials to enhance your proposals.
- » Streamlined order management and personalized follow-up.
- » Exclusive promotions and incentives for our partner channel.

How the program works?

- 1 Request your Velocity quote via the dedicated partner form.
- 2 Present the ready-made offer to your SMB customer.
- 3 Once approved, activation happens within hours - not days or weeks.
- 4 Customers receive a fully operational Falcon deployment on day one.
