

Launch of Exclusive Networks SASE MSP Services

Powered by Netskope

Exclusive Networks launches SASE MSP Services powered by Netskope to accelerate MSP growth.

Bundling Best-in-Class Exclusive Networks services with Netskope Market-leading SASE & ZTNA.

Boulogne, 21st May — Exclusive Networks today announces the launch of **SASE MSP Services powered by Netskope**, a streamlined, market-ready set of Exclusive Networks security services bundled with Netskope technology and designed to help partners accelerate time-to-revenue, simplify licencing and deliver advanced cloud security services to their mid-market customers.

The offering was created in response to two market drivers: the rapid shift to cloud and GenAI-enabled workflows, and the progressive dissolution of the traditional network perimeter.

Exclusive Networks SASE MSP Services package Netskope Next-Gen Secure Web Gateway, Netskope Zero Trust Network Access (ZTNA), and Netskope Security Service Edge (SSE) tiered bundles with **per-user licencing** and **MSP Premium support** — enabling partners to sell, deploy, and operate modern security services faster and with predictable economics.

Key benefits for partners:

Faster time-to-market and predictable pricing

- Per-user, per-year licencing simplifies quoting and billing.
- Pre-defined package tiers (Standard / Professional / Enterprise) accelerate commercial and deployment cycles.

Operational excellence and market differentiation

- All Bundles include MSP Premium support delivered by an award-winning Exclusive Networks team.
- Advanced features included such as Netskope SkopeAI for GenAI, Netskope DLP, Netskope Advanced Threat Protection and Netskope Advanced Analytics to raise service value and conversion rates.

Flexible service models to match customer needs

- Options cover inline web protection (Netskope Next Gen SWG), full Zero Trust access (Netskope ZTNA Next / Netskope ZTNA Next 360) and integrated Netskope SSE Private Access — letting partners target Mid-Market customers with clear positioning and ROI.

*“By launching these SASE MSP Services, we are empowering our ecosystem to lead the **GenAI and cloud revolution**. By bundling Netskope’s market-leading technology—including **SkopeAI**—with our specialised MSP Premium support and **simplified per-user licencing**, we are giving partners a market-ready platform to drive immediate value and secure the modern, borderless enterprise.”*

said Paul Eccleston, Chief Business Innovation Officer at Exclusive Networks.

“By combining proven Netskope capabilities with predictable licencing and dedicated MSP support, Exclusive Networks empowers partners to deliver best in class SASE services with enhanced data visibility and protection, all while improving their users’ overall experience.”

said Laurent Gondicart, Vice President EMEA Channel at Netskope.

Exclusive Networks will make the SASE MSP Services bundles available immediately through its partner channels. MSPs can choose the combination of SWG, ZTNA and SSE that matches their go-to-market strategy and customer demand.
